WORK EXPERIENCE

Full-Stack Experience & Projects

Freelance Full Stack Developer

November 2023 - Present

Developing diverse web applications and systems with a focus on functionality, performance, and user experience.

Some examples:

Four Seasons Shopping, LLC (October 2024 – Present)

- Contributing to the development of an integrated ERP system for a U.S.-based company, including inventory management, price control, profit tracking, and stock monitoring.
- Conducting debugging and implemented minor corrections for general system updates.

Tech Stack: **Node.js, React, JavaScript, CSS, Sequelize, MySQL.**

AWA Gazebos (November 2023 – June 2024)

- Developed an informational e-commerce platform for an SME specializing in gazebo sales.
- Features include a product showcase with detailed descriptions, vendor management portal, WhatsApp integration, secure payments, search and filtering tools, responsive design, and real-time notifications.

Tech Stack: **React, Redux, JavaScript, CSS, Sequelize, PostgreSQL, Node.js.**

Additional Libraries: **Bootstrap**

Personal Portfolio Projects:

Hiking Places App - Demo (June 2024 – November 2024)

- Built an app enabling users to discover hiking spots, create accounts, and add new hiking locations via an interactive form. Currently in demo mode, with final touches and optimizations in progress.
- Features include detailed user profiles, interactive maps, trail creation, likes, comments, and a favorite trails section.

Tech Stack: **Node.js, React, JavaScript, CSS, Sequelize, PostgreSQL.**

Additional Libraries: **Bootstrap, React Bootstrap, Leaflet.**

Academic Projects

Front-End Developer (Henry Project)

October 2023 - November 2023

- Developed an e-commerce platform for a 3D printing company.
- Designed and styled key components (e.g., navbar, carousel, footer, detail page, shopping cart) and implemented features like Cloudinary integration, ratings, and comments.
- Collaborated using Scrum and Agile methodologies.

Tech Stack: **React, Redux, JavaScript, CSS.**

Additional Libraries: **Bootstrap**

Full-Stack Developer (Henry Project)

August 2023 - September 2023

- Built a Single Page Application to display and manage country data.
- Features include search, filtering, sorting, and pagination, with data fetched and stored in a local database.

Tech Stack: **React, Redux, Node.js, Express.js, Sequelize, PostgreSQL, CSS.**

Additional Libraries: **Bootstrap**
